The Prix Galien USA Awards will be 10 years old in 2016. To celebrate our participating companies' leadership in confirming this past decade as one of history's most productive for research, the committee will select one product from each of the three award categories as the "Discovery of the Decade." Nominations are open to every medicine and device that the awards committee selected as the category winner in our previous annual honors since 2007 – 34 products in all and will also include the 2016 Prix Galien USA Laureates. The granting of these three new awards will feature as a special highlight of the Prix Galien USA Ceremony, which once again will be held at the American Museum of Natural History in New York on October 27, 2016.
